ABOUT ME

AI-driven Business Analyst with a Master's degree in Artificial Intelligence. Experienced in deep learning (DQN, AutoEncoders, Transformers) and data analytics. Skilled in automation, Software development, SQL databases, APIs, and WebServices. I bridge business needs with technical solutions, leveraging data insights to optimize processes and drive corporate growth.

EXPERIENCE

2023 - PRESENT
Tunis, Tunisia

NEOLEDGE EUR

- I provide expertise and cost estimations, develop automation tools in C#, and manage API integrations for seamless data exchange. I test and configure the product, and support clients with troubleshooting. Additionally, I create dashboards for decision-making and optimize database management.

2022 - 2022
Ariana, Tunisia

MEDIANET

- I develop Business Intelligence systems to track KPIs, create data warehouses and visualizations for business insights, and enhance teamwork and time management skills.
